COMMERCIAL RABBIT FARMING.

Last year 90,000,000 rabbits were sold in the municipal markets of France, hundreds of America's great physicians recommend Flemish Giant rabbit meat for aged and run-down people, on account of its great nutritive value and the fact that it is so easily digested. It is predicted that the breeding of rabbits is only in its infancy and will be the largest of any known industry ever known in the United States. In the United States we have millions of families complaining of hard times, and yet buying high priced meats, when their back yards are grown high with nutritious weeds, that could be turned into delicious rabbit fries, with no cost. It costs nothing to raise rabbits in the summer months. We have the original imported Flemish Giants, when three months old are twice the size of wild rabbits. Come and see them.

A number of Gettysburg people have brought their children out to see the rabbits. We give every car that comes one gallon best Automobile Oil for 50 cents.

Republicans Find Fault
With Themselves.

The Republican National Committee, in a statement, condemns Congress, in each branch of which the Republicans have a majority, as follows:

"This Congress has been in session four months. It has not passed any majority legislation. It has passed but one appropriation bill. It has not enacted any laws to relieve the agricultural situation. It has not enacted a tax-reduction law. With the exception of a few private bills, it has done nothing in the way of legislation. It has not even proposed or advanced any constructive program. On the other hand, it has blocked the program outlined by President Coolidge in his message to Congress in December."

The Frederick Masonic Choir, under the direction of Grayson H. Staley, will give a recital in Taneytown Opera House, on Wednesday evening, April 30, at 8:15.

Responsibilities

The public are more than users of telephone service.

They, and no one else, provide the money necessary to conduct the business, and look to the business to pay adequately on that investment.

The public tell us what to do, when to do it, and where to do it.

They tell us how much service they want, and when and where they want it.

We take these figures and find

out what it will cost to install the telephones, along with the central office equipment, wires, cables and buildings needed.

Then we must go to the public for the new money necessary to finance these additions.

The telephone using public pay us for their service, and they must pay us enough so that we can pay back to the same public, as investors, a reasonable return on the money they put into the business.

Or it might be summed up this way: Telephone rates must be adequate to enable us to make a reasonable return on the money invested in the business. Otherwise the public will not invest the new money needed to give the tremendous amount of new telephone service which is required by the people of this State.

Your Next Car

Will be this Light-Six, if you learn the truth

WHEN you buy a car in the "thousand-dollar" class, here are some things you should know.

We made a canvass of men who bought rival cars in this class. And we found that 96 in each 100 bought without knowing these facts.

So, for your sake and our sake, we want to present them to you.

Save \$200 to \$400

Studebaker builds 150,000 fine cars yearly. It builds in model factories, modernly equipped. It has spent \$38,000,000 in the past five years on new-day plants and equipment.

By quantity and up-to-dateness it saves large sums per car. A car like this Light-Six, built under ordinary conditions, would cost \$200 to \$400 more.

11.4% less to run

This supreme quality means lower operating cost. Owners of fleets of cars in this class made audited records to prove this.

They compared 329 cars, running up to 25,000 miles each. And they found that the Studebaker Light-Six cost 11.4% less to operate than the average of its rivals. This includes depreciation. The saving was nearly one cent per mile.

The reasons are these

The Studebaker Light-Six, in its chassis, represents the best we know. In steel and in workmanship it is identical with the costliest cars we build.

It is designed and superintended by an engineering department which costs us \$500,000 yearly.

Each steel formula has been proved the best for its purpose by years of tests. On some we pay 15% premium to makers to get them exactly right.

Each car in the building gets 32,000 tests and inspections.

The crankshafts are machined on

inch. And 122 are exact to one-half that.

Genuine leather cushions, ten inches deep. Unusual equipment. Scores of extra values.

Made by the leaders

This is one of the cars which has made Studebaker the leader in quality cars. Our sales have almost trebled in three years. The trend toward Studebakers has become a sensation.

Last year 145,167 people paid \$201,000,000 for Studebaker cars.

Back of this car is an honored name, which for 72 years has stood for high ideals.

Behind it are \$90,000,000 of assets, staked on pleasing you better than others.

Before you pay \$1,000 or more for a car, these are facts you should know and compare. You owe that to yourself.

Send for the book

Mail us the coupon below. We will send you free our new book that will inform you on five simple things which reveal the value of a car. For instance: It will enable you to look at any car and tell whether it's been cheapened to meet a price or offers true quality.

It will tell you why some cars rattle at 20,000 miles and others don't. It shows one single point in a closed car which measures whether you're getting top or medium quality. The book is free—clip the coupon below,
